FORTY-FIRST ANNUAL REPORT

OF THE

TRUSTEES

OF

THE BOSTON CITY HOSPITAL,

WITH

REPORT OF THE SUPERINTENDENT,

THE MEDICAL AND SURGICAL STATISTICS, HOUSE RULES,
WITH RULES FOR ADMISSION, DISCHARGE, AND
GOVERNMENT OF PATIENTS, ETC.

FOR THE FORTY-FIRST YEAR, FEBRUARY 1, 1904,
TO JANUARY 31, 1905, INCLUSIVE.

TRUSTEES.

A. SHUMAN, <i>President</i>	.	.	.	Term expires in 1905.
CONRAD J. RUETER, <i>Secretary</i>	.	.	.	Term expires in 1908.
HENRY H. SPRAGUE	.	.	.	Term expires in 1904.
FRANCIS J. KEANY, M.D.	.	.	.	Term expires in 1907.
EDMUND D. CODMAN	.	.	.	Term expires in 1906.

MEDICAL AND SURGICAL STAFF.

Consulting Physicians and Surgeons.

Edward H. Bradford, M.D.		Charles F. Folsom, M.D.
Thomas M. Rotch, M.D.		Vincent Y. Bowditch, M.D.

Superintendent and Resident Physician.

GEORGE H. M. ROWE, M.D.

Senior Physicians.

John G. Blake, M.D.		A. L. Mason, M.D.
---------------------	--	-------------------

Visiting Physicians.

G. B. Shattuck, M.D.		Chas. F. Withington, M.D.
E. M. Buckingham, M.D.		Henry Jackson, M.D.
Francis H. Williams, M.D.		George G. Sears, M.D.

Assistant Visiting Physicians.

John L. Ames, M.D.		John W. Bartol, M.D.
H. D. Arnold, M.D.		John N. Coolidge, M.D.

Physicians to Out-Patients.

Elliott P. Joslin, M.D.		Franklin W. White, M.D.
William H. Robey, Jr., M.D.		Edwin A. Locke, M.D.
Ralph C. Larrabee, M.D.		Edward N. Libby, M.D.

Assistant to the Physicians to Out-Patients.

* Francis W. Palfrey, M.D.

Senior Surgeons.

D. W. Cheever, M.D.		Geo. W. Gay, M.D.
---------------------	--	-------------------

* Appointed for six months beginning October 26, 1904.

Advisory Surgeon.

J. ORNE GREEN, M.D.

Senior Visiting Surgeons.

Wm. P. Bolles, M.D. | Abner Post, M.D.

M. F. Gavin, M.D.

Junior Visiting Surgeons.

H. L. Burrell, M.D. | Francis S. Watson, M.D.

H. W. Cushing, M.D.

First Assistant Visiting Surgeons.

George H. Monks, M.D. | Paul Thorndike, M.D.

J. Bapst Blake, M.D.

Second Assistant Visiting Surgeons.

Fred B. Lund, M.D. | Edward H. Nichols, M.D.

Howard A. Lothrop, M.D.

Third Assistant Visiting Surgeons.

Frederic J. Cotton, M.D. | L. R. G. Crandon, M.D.

William E. Faulkner, M.D. | David D. Scannell, M.D.

Joshua C. Hubbard, M.D. | Walter C. Howe, M.D.

Senior Visiting Physician for Diseases of Women.

Charles M. Green, M.D.

First Assistant Visiting Physician for Diseases of Women.

Franklin S. Newell, M.D.

Second Assistant Visiting Physician for Diseases of Women.

Ernest B. Young, M.D.

Third Assistant Visiting Physician for Diseases of Women.

Leo V. Friedman, M.D.

Visiting Ophthalmic Surgeon.

O. F. Wadsworth, M.D.

Ophthalmic Surgeons.

John C. Bossidy, M.D. | Edward R. Williams, M.D.
Allen Greenwood, M.D.

Assistants to the Ophthalmic Surgeons.

Robert G. Loring, M.D. | Charles F. Moulton, M.D.
Peter H. Thompson, M.D.

Visiting Aural Surgeon.

George A. Leland, M.D.

Aural Surgeon.

Edgar M. Holmes, M.D.

Assistants to the Aural Surgeons.

Charles D. Underhill, M.D. | Charles R. C. Borden, M.D.

Surgeons for Diseases of the Throat.

Thos. Amory DeBlois, M.D. | J. W. Farlow, M.D.

Assistants to the Surgeons for Diseases of the Throat.

Rockwell A. Coffin, M.D. | George L. Vogel, M.D.

Physicians for Diseases of the Nervous System.

Morton Prince, M.D. | Philip Coombs Knapp, M.D.
Wm. N. Bullard, M.D.

Assistant Physicians for Diseases of the Nervous System.

John J. Thomas, M.D. | Joseph W. Courtney, M.D.

Assistant to the Physicians for Diseases of the Nervous System.

Marsena P. Smithwick, M.D.

Physicians for Diseases of the Skin.

James S. Howe, M.D. | George F. Harding, M.D.

Visiting Pathologist.

Wm. T. Councilman, M.D.

First Assistant Visiting Pathologist.

F. B. Mallory, M.D.

Second Assistant Visiting Pathologist.

Henry A. Christian, M.D.

First Assistant in Pathology.

S. Burt Wolbach, M.D.

Second Assistant in Pathology.

Charles W. Duval, M.D.

Assistant in Clinical Pathology.

Robert L. Emerson, M.D.

Medico-Legal Pathologist.

F. W. Draper, M.D.

Physician for Infectious Diseases.

John H. McCollom, M.D.

Physician for X-Ray Service.

Francis H. Williams, M.D.

Medical Registrar.

John N. Coolidge, M. D.

Surgical Registrar.

Fred B. Lund, M.D.

Gynæcological Registrar.

Franklin S. Newell, M.D.

Advisory Staff, South Department.

Wm. T. Councilman, M.D.

John G. Blake, M.D.

George W. Gay, M.D.

A. L. Mason, M.D.

Physicians to the Convalescent Home.

REPORT OF THE TRUSTEES.

THE BOSTON CITY HOSPITAL,
BOSTON, January 31, 1905.

HON. PATRICK A. COLLINS,

Mayor of the City of Boston :

SIR, — The Trustees of The Boston City Hospital, in compliance with the Ordinances, respectfully present herewith the forty-first annual report of the Hospital Department for the year beginning February 1, 1904, to January 31, 1905, inclusive. The Hospital Department consists of the main Hospital, the South Department for infectious diseases, the Relief Station in Haymarket Square and the Convalescent Home in Dorchester.

HOSPITAL PROPER.

PRINCIPAL STATISTICS, 1904–1905.

NUMBER OF PATIENTS.

Number of patients remaining in the Hospital January 31, 1904	447
Admitted from February 1, 1904, to January 31, 1905, inclusive :	
Medical	3,464
Surgical	4,169
Gynæcological	937
Ophthalmic	96
Aural	123
	<hr/> 8,789
Treated during the year	<hr/> 9,236
Discharged during the year	7,794
Died during the year	976
	<hr/> 8,770

Number of patients remaining in the Hospital January 31, 1905	466
Largest number of patients in the Hospital at any one time	491
Smallest number of patients in the Hospital at any one time	368
Daily average number of patients	429
Average number of days' stay of patients	17
Number of patients accidentally injured, admitted	772
Number of weeks' treatment given in Hospital	22,451
Number of days' treatment given in Hospital	157,159
Number of applicants for admission to Hospital	12,223
Number of applicants rejected	3,434
Number of patients treated in Out-Patient Departments,	37,608
Number of visits made by out-patients	114,301
Patients carried in ambulances	3,126

Number of out-patients treated in the Out-Patient Departments, classified according to diseases:

For medical diseases	5,584
“ surgical diseases	18,344
“ diseases of the eye	2,102
“ “ “ ear	1,210
“ “ “ skin	1,792
“ “ of women	949
“ “ of the nervous system	668
“ “ “ throat	2,219
Surgical out-patients treated in the accident rooms, and not elsewhere included	4,740
Total number of out-patients	<u>37,608</u>

STATISTICS OF PATIENTS ACCORDING TO SERVICES, FEBRUARY 1, 1904,
TO JANUARY 31, 1905, INCLUSIVE.

SERVICES.	In Hospital Feb. 1, 1904.	Admitted.	Discharged.	Died.	Total Discharged and Died.	In Hospital Feb. 1, 1905.
First Surgical.....	77	1,351	1,252	109	1,361	67
Second Surgical.....	76	1,394	1,305	95	1,400	70
Third Surgical.....	78	1,424	1,327	110	1,437	65
First Medical.....	48	1,150	912	219	1,131	67
Second Medical.....	57	1,106	902	197	1,099	64
Third Medical.....	50	1,208	1,007	185	1,192	66
Gynæcological.....	47	937	875	57	932	52
Ophthalmic.....	4	96	96	1	97	3
Aural.....	10	123	118	3	121	12
Totals.....	447	8,789	7,794	976	8,770	466

The maximum number of patients in the Hospital proper at any time was 491, and the minimum number 368.

The daily average number of patients was 429. The total number of patients treated in the wards was 9,236.

RECEIPTS AND EXPENDITURES.

Receipts.

City Appropriation	\$485,000 00
Interest from Trust Funds	1,991 50
Gift from Eng Fung	3 00
	<hr/>
	\$486,994 50

Expenditures.

Hospital Proper	\$351,201 17
South Department	90,062 97
Relief Station	35,496 14
Convalescent Home	10,234 22
	<hr/>
	\$486,994 50

The entire expenditures for all departments of the Hospital during the fiscal year were \$486,994.50. Of this amount \$322,840.17 was expended upon the Hospital proper; \$90,062.97 on account of the South Department; \$13,592.33 on account of the eight Out-Patient Departments; \$10,259.99 on account of the Pathological Department; \$4,060.03 on account of the X-Ray Laboratory and Photographic Department; \$35,496.14 on account of the Relief Station; \$10,234.22 for the Convalescent Home, and \$448.65 on account of determining the settlement of non-paying patients.

From the amount expended for the Hospital proper, \$322,840.17 (see Table No. 1 in Superintendent's Report), there should be deducted the difference in the amount of stock on hand February 1, 1905, which was \$3,859.17 more than on January 1, 1904. There should also be deducted \$587.21 for printing the Medical and Surgical Reports, \$608.80 for card cataloguing clinical records, \$250 for claims and \$7,290.88 for all alterations in the Medical Out-Patient Department building, making the total amount properly chargeable as the expenditures for maintenance of the main Hospital for the year, \$310,244.11. This sum was expended for 22,451 weeks' board of patients, but if we deduct the money collected for paying patients, interest of trust funds and other income, the *net cost* to the city *per capita per week* was \$11.17.

The report of the Superintendent, presented herewith, contains a more detailed statement of the year's expenditures, various tables relating to patients admitted, and is accompanied by the medical and surgical statistics and other information. These tables give in detail the number of patients treated in the various departments during the year, with classified statements of their diseases and results of treatment.

PAYING PATIENTS.

There has been collected on account of the care and treatment of patients of all classes the sum of \$52,610.65. There was received from the Commonwealth of Massachusetts for the board of patients, \$13,873.84; from various cities and towns, \$10,352.95; collected at the Superintendent's office

on account of private room and ward paying patients, \$25,826.65; for board of paying patients at the South Department, \$2,388.05; for the board of patients at the Relief Station, \$169.16. There has also been collected for the Hospital, by the Board of Health, for the care of infectious cases at the South Department, and paid to the City Collector, the additional sum of \$4,647.14, making the total amount credited to the Hospital Department on account of paying patients, \$57,257.79.

OUT-PATIENT DEPARTMENTS.

The total number of out-patients treated in the various out-patient services during the year was 37,608 as against 34,734 during the previous year, and the number of visits made by patients was 114,301 as against 108,280.

During the present year the new Out-Patient building has been completed and occupied. The description of this building may be found in last year's annual report, on pages 67 and 68, together with prints of the building, both of the exterior and interior. The arrangement of the various Out-Patient departments is as follows: On the lower floor, right wing, is the Genito-Urinary Surgical Department; left wing, massage rooms. First floor, right wing, Surgical Department for men; left wing, the Nervous Department. On the second floor, right wing, Surgical Department for women and children; left wing, Gynæcological Department. On third floor, right wing, the Eye and Ear Departments; left wing, Throat Department. The fourth story is occupied as a dormitory for orderlies.

The various out-patient departments were liberally provided with everything necessary or requested for the complete and efficient equipment of the various services. The increased facilities not only greatly aid in the more efficient treatment of patients, but eliminate much that formerly was undesirable, adding to the comfort and privacy of the patients themselves. This has increased the attendance, but it is expected that the present accommodations will be sufficient for some years to come.

The Medical building formerly used by the various Out-Patient departments is now undergoing extensive alterations and repairs. Rooms have been subdivided and rearranged. The first floor serves for the examination of patients for admission and the Skin Department; the entire second floor for the Medical Out-Patient Department for men, and for women and children. The expenditure for the alterations and rearrangement of this Out-Patient building was \$7,290.88.

The X-Ray and Photographic Laboratories continue in temporary quarters on the lower floor of Ward A. The work of this department has been made more efficient by the presentation to the Hospital of one Heinze coil with table, interrupter, circuit transformer, and many minor accessories necessary for X-Ray and fluoroscopic work; a violet ray apparatus and numerous attachments, electrodes, cabinets and minor details — all the gift of a generous donor.

The records of this department for the year show the following statistics:

Number of patients of whom radiographs (A) have been made	1,334
Number of patients of whom photographs (B) have been made	102
Number of patients of whom fluoroscopic examinations (C) have been made	117
<hr/>	
Total number patients	1,553
Requisitions for extra copies, etc., filled	34
<hr/>	
Total requisitions (A, B, C) filled	1,587
Total number of negatives made (A, B)	2,037
Total number of X-Ray treatments	2,381
Total number radiographs, photographs, examinations and treatments	3,934
<hr/>	

This department works daily for the indoor services, in fluoroscopic examinations and X-Ray diagnosis and treatment. It is open three days in the week to out-patients, the daily average of this clinic being 30 patients. The work is still done at much disadvantage, unavoidable in work on the lower

floors of buildings, but as sunlight is the one thing that can be dispensed with in this department, though indispensable in others, it has accomplished very efficient work and bestowed its benefits on a large number of people. It is expected that at no distant date this department will be reorganized in its accommodations, as the matter is already under consideration. The principal machines which can now be used are the following: Four static machines, one of four revolving plates, 72 inches in diameter; one of eight revolving plates, 72 inches in diameter; two revolving plates, 48 inches each; one Heinze coil—all having suitable motors and the numerous attachments and machinery necessary for the variations required in this work.

PRESENT CAPACITY OF THE HOSPITAL DEPARTMENTS.

The schedule of beds remains the same as during the previous year, as follows:

Hospital proper	615
South Department	264
Relief Station	20
Convalescent Home	36
Total	935

The distribution of the beds in the main department is as follows:

	WARD.		PRIVATE.		TOTAL.
	Male.	Female.	Male.	Female.	
Surgical.....	167	104	21	17	309
Medical.....	141	79	10	7	237
Gynecological.....	51	2	53
Ophthalmic and Aural.....	7	9	16
	315	243	31	26	615

By reason of the construction of new buildings and the diversion of various wards from their regular purposes to the uses of expediency, the Hospital, for the first time in four years, is now able to classify its patients in accordance with its standard classification and according to the capacity required. While the total service of beds of all departments is 935, the total number of patients would rarely be that number. The various services and sub-departments of the Hospital and the different wards requiring distribution according to disease or sex, or ward or private patients, are so varied that it would be extremely unusual for every bed in so large a hospital to be occupied at the same time.

SOUTH DEPARTMENT.

The principal statistics for the South Department for infectious diseases for the year February 1, 1904, to January 31, 1905, are as follows:

Number of patients remaining in the South Department, January 31, 1904	264
Admitted from February 1, 1904, to January 31, 1905, inclusive	2,048
	<hr/>
Treated during the year	2312
Discharged during the year 1,942	
Died during the year 184	
	<hr/>
	2126
Number of patients remaining January 31, 1905,	186
Maximum number of patients at any one time	264
Minimum number of patients at any one time	125
Daily average number of patients	187
Average number of days' stay of patients	29 $\frac{6}{10}$
Number of days' treatment given patients	68478
Number of weeks' treatment given patients	9,732.5
Number of applicants for admission	2751
Number of patients rejected	703
Patients carried in ambulances	1616
Number of patients admitted over fifteen years of age	430
Number of patients dying within twenty-four hours of admission	40

Number of patients dying within forty-eight hours of admission	17
Average age of patients	9.6
Percentage of deaths to total number of patients for the year	7.9
Percentage of deaths to discharges	8.6
Percentage of deaths to total number of patients for the year, less those occurring within twenty-four hours of admission	6.2
Percentage of deaths to discharges, less those occurring within twenty-four hours of admission,	6.7
Percentage of deaths within twenty-four hours to whole number of deaths	21.7
The death rate from diphtheria for the year ending January 31, 1905, was	9.9
Number of days' board given persons	107,115
Number of weeks' board given persons	15,302
Total expenditures	\$90,062.97
Average weekly cost per patient	\$9.21

The expenditure upon this department has been \$90,062.97. If to this is added the difference in the amount of the stock on hand at the beginning and close of the year, which was \$109.59 less at the end of the year, it would give \$90,172.56 as the cost of maintenance. This sum was expended upon 2,312 patients, and divided by 9,782 weeks' board, gives \$9.21 as the *per capita* cost per week. The cost of subsistence supplies was \$22,706.79; the total weeks' board for an average of 293 persons was 15,302. This gives a weekly cost per patient for uncooked food supplies of \$1.48 per week, or 21 cents per day. This very small average cost is explained by the fact that 75 per cent. of the patients are children. There will be found on pages 50 to 53 a detailed account of the expenditures of this department in the various subdivisions, which are upon the same general plan as at the Hospital proper.

It is interesting to note that during the ten years that this department has been in existence 23,435 patients have been received, all of whom were ill with infectious diseases. It is also interesting to note that parents, particularly those of the working class, bring their children to the South Department

with less hesitancy, and much of the prejudice previously existing against sending children to public hospitals has been dissipated.

One of the most gratifying results about the department for infectious diseases is the great decrease in the rate of mortality in diphtheria, particularly since the use of antitoxin. Dr. McCollom, the Resident Physician, in his report to the Medical Committee, says: "It will be seen from the subjoined charts and tables that previous to the opening of the South Department in 1895, the average rate of mortality per 10,000 of the inhabitants, from 1875 to 1894 inclusive, was 14.61 per cent., while that from 1895, the date when the South Department was opened, to 1904 inclusive, was 6.42 per cent., a diminution in the mortality of over one-half."

"The average ratio of the morbidity of scarlet fever from 1875 to 1894 was 34.84 per cent., while that from 1895 to 1904 was 24.68 per cent., a very considerable diminution. The mortality rate for the first period was 2.99 per cent., while that for the second period was 1.91 per cent.

"It is very interesting to note that a very large proportion of the patients in Boston who are seriously ill with scarlet fever are sent to the South Department."

In order to prevent the occurrence of return cases, the following circular is given to each patient when discharged from the South Department:

"Advice to the Parents of Patients who are Discharged from the Wards Set Apart for Infectious Diseases."

"1. To avoid any possible danger of the communication of scarlet fever, measles, or diphtheria to other members of the family, it is much safer for any person who has just been discharged from the wards used for these diseases to sleep alone for at least one week, and preferably for two weeks.

"2. These diseases are especially likely to be spread by means of discharges from the ears or nose, or from any running sore on the body, long after the patient is otherwise entirely well. Therefore, if at any time during two weeks after discharge from the Hospital the patient shows any such

trouble, he should immediately be brought back to the Hospital for examination, and in the mean time should keep as much as possible away from others, and should not use the same towel, brush, comb or other toilet articles that others use. When there is any such discharge, handkerchiefs, etc., that are used should be burned when it is possible; when this is not possible, they should be thoroughly boiled. It is better that separate toilet articles be used even if there is no apparent trouble.

“3. When a person comes home from an infectious ward, the clothing, toys, books, etc., used by him at the time he was taken sick, should not be brought out again unless it is certain that they were thoroughly disinfected. This advice is especially important in cases of scarlet fever.”

While the South Department is admirably adapted for the purposes of treatment of infectious disease, a notable deficiency exists, that is,— a separate building for the treatment of measles. Measles is in many cases a much more serious disease than is generally supposed. It is a self-evident proposition that the only way to stamp out an epidemic is to have suitable wards ready at the outbreak to which the first cases can be taken. In the course of ten years there have been several epidemics of measles in Boston. These cases could not be received in the Hospital because it had no separate building. To admit them to parts of the existing buildings made liable an epidemic of measles in other children already in the Hospital. The Trustees in several of their annual reports have called attention to the fact that it was originally intended and plans were drawn for the erection of a separate building for measles, but the funds were not sufficient, and the department has been ten years without a suitable building for treating this disease. The Trustees again recommend that a special appropriation should be made providing a suitable building for measles. While the well-to-do and even the middle class can isolate their children ill with measles, this cannot be done in institutions, especially those for children, or in hotels, boarding and tenement houses. There is so much public interest in this that the Trustees have

repeatedly received recommendations from the Advisory Staff of the South Department, from outside physicians, and even in the daily press. The South Department cannot be considered complete until such provision is made.

The affairs of the South Department have been well conducted during the present year, and there has been no calamity or unhappy accident to mar its work and great usefulness to the public.

RELIEF STATION.

The following are the principal statistics for the year:

Number of ward patients treated	1,108
Number of out-patients treated	28,073
<hr/>	
Total patients treated	29,181
Largest number of out-patients treated on any one day	188
Number of major surgical operations	53
Number of deaths	98
Number of deaths within twenty-four hours of admission	55
Number of days' treatment given patients in the wards	2,575
Largest number of ward patients on any one day .	15
Smallest number of ward patients on any one day .	1
Average stay of ward patients in days	2 $\frac{3}{16}$
Daily average in wards	7
Number of ambulance calls	960
Number of ambulance trips for transfers of admitted patients to Hospital proper .	532
Miscellaneous ambulance trips	90
<hr/>	
Total ambulance trips	1,582
Number of patients transferred to Hospital proper .	698
Number of cases brought by police ambulances and patrol wagons	1,209
Total expenditures, Relief Station	\$35,496.14

The Relief Station has been in commission three years. There has been an annual increase in the number of patients treated and the number of first dressings, the number this

year being 28,073. The Trustees have numerous evidences of the appreciation of this Station in its work of public relief. It has been gratifying that, considering the very large number of patients treated, the seriousness of many cases, and the consequent excitability of the patients and friends, there have been few complaints, and these of a trivial nature. The many departments of the Hospital render the public a large service, but none is more helpful than this special work.

CONVALESCENT HOME.

The number of patients treated during the year was 349, who have received 7,401 days' treatment at an average weekly cost of \$9.68.

The painting of all the buildings during the year, at a cost of \$508, has added more than usual to the average annual expenditure. The trees, shrubs and vines planted twelve years ago have justified the wisdom of the plan, and now present beautiful rural surroundings which add much to the pleasure of the patients. This Convalescent Home is a valuable adjunct in the treatment of the patients of the main Hospital during their convalescence.

PATHOLOGICAL LABORATORY.

The work of this important part of the Hospital Department has progressed satisfactorily this year, and the amount of work is much larger than ever before. The following is a brief summary of a part of the work of this department during the year, as appears by its annual report. Cultures were made in

Surgical diagnoses	941
Diphtheria bacilli for the South Department .	11,633
Pathological bacteria	721
Bacteria for the wards	1,449
<hr/>	
Total of cultures made	14,744

The report from this department says :

“There has been a distinct advance in the quality of the work done in bacteriology.

“A moderate amount of original work has been accomplished during the year.

“The laboratory has acquired a number of very necessary pieces of apparatus, thereby helping to make the routine work easier and more efficient.”

The following papers have been published by the members of the Hospital Staff and special workers in the laboratory during the year:

Studies on the Pathology and on the Etiology of Variola and of Vaccinia. By Drs. Councilman, Magrath, Brinckerhoff, Tyzzer, Southard, Thompson, Bancroft and Calkins.

Scarlet Fever. Protozoon-like Bodies Found in Four Cases. By F. B. Mallory, M.D.

A Case of Early Acute Pancreatitis without Hæmorrhage. By H. H. Germain, M.D., and H. A. Christian, M.D.

Some Newer Aspects of the Pathology of Fat and Fatty Degeneration. By H. A. Christian, M.D.

The Life Cycle of the Organism of “Dermatitis Coccidioides.” By S. B. Wolbach, M.D.

Another Member of the Dysentery Group. By C. W. Duval, M.D.

The Protozoon of Scarlet Fever. Preliminary Report. By C. W. Duval, M.D.

A Case of Chronic Internal Hydrocephalus in a Youth. By E. E. Southard, M.D., and W. F. Roberts, M.D.

The Central Nervous System in Variola. By E. E. Southard, M.D.

A Case of Glioma in the Sella Turcica. By E. E. Southard, M.D., and F. H. Howard, M.D.

Outline of Neuropathology. By E. E. Southard, M.D.

A Case of Cortical Hæmorrhages following Scarlet Fever. By E. E. Southard, M.D., and F. R. Sims, M.D.

A Case of Diffuse Encephalitis showing the Pneumococcus. By F. R. Sims, M.D., and W. N. Bullard, M.D.

TRAINING SCHOOL FOR NURSES.

This school has now completed its twenty-seventh year. The number of pupils is 149, and forty-eight nurses have been graduated during the year. Further statistics and information on the subject of the training school for nurses will be found in the report of the Superintendent.

GIFTS AND PERSONAL ASSISTANCE.

During the year the executors of the Lamont G. Burnham estate paid over to the Trustees of this Hospital Mr. Burnham's legacy of \$150,000, with interest for one year amounting to \$3,750. The same has been deposited with the Treasurer of the City of Boston, to the credit of the Hospital, and is known as the "Lamont G. Burnham Building Fund."

Item 14 in the will of the late Mr. Lamont G. Burnham reads: "I give said sum of \$150,000 to The Boston City Hospital to construct and equip upon the Hospital grounds a building to be known as the Lamont G. Burnham Ward, for such uses and purposes as the Trustees of said Hospital shall in their discretion determine." The Trustees have for some time discussed the purpose and manner in which a suitable memorial building should be erected as the Lamont G. Burnham Ward, and expect to come to an early decision.

The Trustees take pleasure in recording the donation of valuable additions of apparatus for the further enlargement of the X-Ray Department, in money value about \$3,000. The name of the donor is withheld by request. It is interesting to know, however, that the person who presented the Hospital with this donation was led to do so by reason of her becoming thoroughly acquainted with the beneficial effect of the X-Ray treatment upon one of her servants.

The Trustees present this as tangible evidence of what may be done in assisting the Hospital in special and definite ways, and is particularly mentioned to call the attention of other generous persons who might be disposed to render similar beneficence.

The Trustees further acknowledge a gift of \$3 from Eng Fung, as being the grateful acknowledgment of a poor man to the Hospital which helped him in time of trouble.

The Trustees acknowledge the gifts of portraits of the following named gentlemen, now deceased, but who were formerly connected with the Hospital Visiting Staff: Henry W. Williams, M.D., for many years connected with the Ophthalmic Department, who was its first Ophthalmic Surgeon, and a member of the original Hospital Staff; Charles E. Buckingham, M.D., one of the first and for many years a Visiting Surgeon; and George J. Arnold, M.D., who for nine years was one of the Visiting Physicians.

The Trustees further extend their grateful thanks to the many friends who have contributed to the welfare and comfort of the patients. Throughout the year the Hospital has received many gifts of books, reading matter, clothing for poor patients, and toys for children. The various benevolent associations and societies, the flower mission, and the clergymen of the city have continued their ministrations, each in its own way helping to relieve the tedium of the patients.

MEDICAL AND SURGICAL STAFF.

The following are the changes in the Medical and Surgical Staff during the year just closed:

F. Robertson Sims, M.D., temporary Second Assistant Physician for Diseases of the Nervous System; Elmer E. Southard, M.D., First Assistant in Pathology; and Ralph L. Thompson, M.D., First Assistant in Pathology, resigned their positions.

The following promotion has been made: S. Burt Wolbach, M.D., from Second Assistant in Pathology to First Assistant in Pathology.

The following new appointments were made: Ralph L. Thompson, M.D., First Assistant in Pathology; S. Burt Wolbach, M.D., Second Assistant in Pathology; Marsena P. Smithwick, M.D., Assistant to the Physicians for Diseases of the Nervous System; Charles W. Duval, M.D., Second Assistant in Pathology. The following temporary

appointments were made: Howard H. Smith, M.D., Assistant to the Physicians to Out-Patients for six months beginning March 16, 1904; Francis W. Palfrey, M.D., Assistant to the Physicians to Out-Patients for six months beginning October 26, 1904; Frederick R. Sims, M.D., Assistant to the Physicians for Diseases of the Nervous System for six months beginning March 16, 1904; C. Morton Smith, M.D., Assistant to the Physicians for Diseases of the Skin for six months beginning June 15, 1904; Nathaniel R. Mason, M.D., Fourth Assistant Visiting Physician for Diseases of Women from August 31, 1904, to January 1, 1905. During the year the office of Physician for X-Ray Service was created, and Francis H. Williams, M.D., was appointed to the position.

W. T. Councilman, M.D., George W. Gay, M.D., John G. Blake, M.D., and A. L. Mason, M.D., were reappointed as Advisory Staff for the South Department.

The thanks of the Trustees are especially due to the gentlemen of the Medical and Surgical Staff for their constant and laborious attendance upon the sick, and for their interest in all matters relating to the Hospital.

Respectfully submitted,

A. SHUMAN, *President*,
HENRY H. SPRAGUE,
CONRAD J. RUETER, *Secretary*,
FRANCIS J. KEANY, M.D.,
EDMUND D. CODMAN.

REPORT OF THE SUPERINTENDENT AND RESIDENT PHYSICIAN.

THE BOSTON CITY HOSPITAL, January 31, 1905.

To the Trustees :

GENTLEMEN, — I have the honor to present herewith my annual report of the Hospital Department for the year February 1, 1904, to January 31, 1905, inclusive.

The Hospital is now near the close of its forty-first year. The following table shows the number of patients who have applied for admission and been treated at the Hospital proper during the last ten years :

	Patients examined for ad- mission.	Patients admitted.	Patients acciden- tally injured.	Number of out- patients treated.
From February 1, 1895, to Jan. 31, 1896.....	11,589	7,956	1,469	17,740
From February 1, 1896, to Jan. 31, 1897.....	11,396	7,941	1,991	20,562
From February 1, 1897, to Jan. 31, 1898.....	10,999	7,916	1,359	22,712
From February 1, 1898, to Jan. 31, 1899.....	11,492	8,231	1,845	22,640
From February 1, 1899, to Jan. 31, 1900.....	11,557	7,945	1,427	26,288
From February 1, 1900, to Jan. 31, 1901.....	11,951	8,131	1,210	27,328
From February 1, 1901, to Jan. 31, 1902.....	12,030	8,033	1,091	28,635
From February 1, 1902, to Jan. 31, 1903.....	12,259	8,076	1,130	31,655
From February 1, 1903, to Jan. 31, 1904.....	12,636	8,150	953	34,734
From February 1, 1904, to Jan. 31, 1905.....	12,223	8,789	772	37,608

The total number of patients admitted to the wards since the beginning of the Hospital has been 211,673; and the number of out-patients has been 592,910.

NUMBER OF PATIENTS TREATED IN THE LAST TEN YEARS,
AND RATE OF MORTALITY.

	Number of Patients Treated.	Died.	Rate of Mortality.
1895-96, year ending Jan. 31, 1896.....	8,439	881	.104

Net cost to the City for maintaining Hospital Proper from February 1, 1904, to January 31, 1905, inclusive.....	\$250,952 42

* Includes \$94 paid to City Collector by Superintendent on account of Board of Health cases.

The tables of disbursements in this report show the expenditures of the Hospital Department during the fiscal year, February 1, 1904, to January 31, 1905, inclusive. Table No. 1 shows the disbursements by departments, according to the general sub-divisions, and includes statistics of the departments divided into the Hospital proper, Out-Patient Departments, Pathological Department, X-Ray Laboratory and Photographic Department, Settlement Account, South Department, Relief Station and Convalescent Home. Table No. 2 shows the disbursements for the year in the same departments, itemizing the various sub-divisions, and includes, for all practical purposes, the quantity, cost and average price paid for the various items.

The total expenditures during the fiscal year for the Hospital Department, in its various branches, have been \$486,994.50, and the disbursements have been made as follows :

The Hospital proper	\$322,840 17
Out-Patient Departments	13,592 33
Pathological Department	10,259 99
X-Ray Laboratory and Photographic Department,	4,060 03
<i>Carried forward</i>	\$350,752 52

<i>Brought forward</i>	\$350,752 52
Settlement Account	448 65
South Department	90,062 97
Relief Station	35,496 14
Convalescent Home	10,234 22
Total	<hr/> \$486,994 50

The main Hospital has four sub-divisions, the Hospital proper, Out-Patient Departments, the Pathological Department and the X-Ray Laboratory. In computing the *pro rata* cost per patient, per week, the cost of the Pathological Department is included in that of the Hospital, and for executive reasons is tabulated separately, in order to show the cost of running that department. The expenditures for the South Department for infectious diseases and the Convalescent Home are kept in separate tables.

The expenditures upon the Hospital proper were for the care of 9,236 patients in the wards for 157,159 days' or 22,451 weeks' board, which makes an average weekly cost of \$13.81, or a daily cost of \$1.97 for patients of all classes. The net cost per patient, per week, to the city was \$11.17. The cost of uncooked food supplies for all persons, including patients and the entire household at the Hospital proper, was \$92,224.91. The average number of patients was 429; of officers and employees, including house and nursing staff, 392, or a total daily average of 821 persons. The number of weeks' board for all persons was 42,964, and the weekly cost per person, for uncooked food supplies, was \$2.14, or 30 cents per day.

The maximum number of patients in the Hospital on any one day was 491, as against 471 in the previous year. The minimum number was 368, in comparison with 370 for the previous year. The daily average during the year was 429, and the average length of stay was 17 days.

There have been treated in the various Out-Patient Departments 37,608 patients, at a cost of \$13,592.33. Other statistics, found elsewhere, include the number of out-patients, number of their visits, rate of mortality, work of ambulances, census of days' board for all persons, and the

nativity of patients admitted and physical condition of patients when discharged, and have been tabulated as Hospital statistics.

The total number of deaths from February 1, 1904, to January 31, 1905, was 976. This does not include the statistics of the South Department, but at the main Hospital only.

Of the deaths, there occurred within 48

hours of admission	328 or $3\frac{5}{10}$ per cent.
Other deaths	648 or 7 “ “

Total	976 or $10\frac{5}{10}$ “ “
-----------------	-----------------------------

the rate of mortality for the year ending January 31, 1905.

This percentage of deaths is for the total number of patients treated in the Hospital. Thirty-three per cent. of the total deaths occurred within forty-eight hours after admission.

During the year 9,236 patients were treated in the wards, 37,608 as out-patients, 349 at the Convalescent Home, 2,312 at the South Department, and 1,108 were treated in the wards, and 28,073 as out-patients at the Relief Station—a total of 78,686 who have received the benefits of the Hospital in all departments.

During the year 12,223 persons applied for admission. Of this number, 8,789 were admitted and 3,434 were rejected, the latter being 1,052 less than last year. The number rejected was 28 per cent. of all persons applying, and the causes of rejection appear in the table of applicants not admitted, on page 37. Of the number applying, 1,042 either changed their minds or were admitted later; of these, 356 were received within three days after application and 118 admitted still later. There were also rejected 271 for want of vacant beds, but of these 103 were admitted later. There were 712 of these applicants who could be treated more properly in the various Out-Patient Services, without the additional cost of receiving them in the wards. Admission was denied to 204 for lack of information that they were suitable cases, but 48 were admitted later; and 150 were

rejected as apparently incurable, or unsuitable for treatment here. Various other causes of rejection appear in the tabulated form on page 37.

The total expenditures in the Hospital Department have been \$486,994.50, but the net cost to the city for maintaining the Hospital proper was only \$250,952.42.

South Department. — The total expenditure for the South Department was \$90,062.97, against \$96,922.95 for the previous year; and allowing for the difference in stock at the beginning and close of the year, the sum of \$90,172.56 represents the cost of maintenance for the fiscal year. The *per capita* weekly cost at the South Department was \$9.21.

Out-Patient Services. — The expenditure in the various Out-Patient Services was \$13,592.33.

Convalescent Home. — The expenditure for the Convalescent Home was \$10,234.22. The daily average was $20\frac{2}{10}$ patients, and the average weekly cost \$9.68.

The foregoing statistics cover the principal facts as to the work of the Hospital during the last year.

The character of the buildings has required a constant outlay to keep them in good repair. The total expenditure

for the main Hospital, of all kinds, was \$26,544.42; for the Out-Patient Departments, \$482.53; for the Pathological Department, \$673.15; for the South Department, \$6,595.58; for the Relief Station, \$939.29; for the Convalescent Home, \$1,293.21; and for the X-Ray Department, \$174.50.

The statistics of the Convalescent Home, which has just completed its fourteenth year, are as follows:

Number of patients in Home at the beginning of the year,	
January 31, 1904	30
Admitted during the year	319
<hr/>	
Total treated during the year	349
Discharged during the year	332
Number remaining in Home January 31, 1905	17
Largest number on any one day	31
Smallest number on any one day	11
Daily average number of patients	20 $\frac{2}{10}$
Average length of stay in days	21 $\frac{2}{10}$

At the close of the last year there were 3,140 volumes in the Medical Library. There have been added during the year, by purchase, 55, and by donation, 26, or a total of 81, making a total of 3,221 volumes in the library. During the year 615 periodicals and 550 medical monographs or pamphlets have been received.

The index card catalogue to the clinical records has been increased by 20,923 cards, making a total of 213,060 references.

The Training School for Nurses has now completed its twenty-seventh year. The changes in the nursing staff during the year have been as follows:

SUMMARY FROM FEBRUARY 1, 1904, TO FEBRUARY 1, 1905.
 February 1, 1904, the number of nurses was 146

During the year nurses have left as follows:

Have been graduated	48
<hr/>	
<i>Carried forward</i>	48

<i>Brought forward.</i>	48
First Assistant Superintendent of Nurses promoted to Matron, Relief Station	1
Graduate head nurses resigned	18
Pupils dropped for various causes	9
Probationers not accepted	33
Graduate special nurses withdrawn	2
* Pupil nurses died	2
	<hr/>
Total vacancies	113
	<hr/>
Number remaining	33
Graduates retained as head nurses	4
Graduates retained as third-year nurses	13
Pupil nurses readmitted	4
Probationers admitted	92
Graduate special nurses employed	3
	<hr/>
Remaining January 31, 1905	149
	<hr/>

Nurses connected with the school, in the main Hospital,
January 31, 1905:

Assistant Superintendents of Nurses	3
Head nurses	7
Third-year nurses	12
Senior pupils, acting head nurses	3
Senior assistant nurses	27
Junior assistant nurses	37
Probationers	19
Post graduate nurses	3
	<hr/>
	111

In the South Department January 31, 1905:

Day supervisor of nurses	1
Night supervisor of nurses	1
Graduate head nurses	2
Senior assistant nurses	19
Junior assistant nurses	8
	<hr/>
	31
	<hr/>
<i>Carried forward</i>	142

* Typhoid.

<i>Brought forward</i>	142
Relief Station :	
Third-year pupils	2
Senior assistant nurses	3
	— 5
Convalescent Home :	
Graduate nurse, matron	1
Graduate head nurse	1
	— 2
	—
	149

The Training School has graduated 48 nurses during the year, making a total of 824 since it was organized. Fourteen nurses have also completed the third-year course and received the *cum laude* diploma, making a total of 66 third-year nurses.

The Superintendent and her assistants have given 199 class recitations at the Hospital proper, and 124 at the South Department, making a total of 323 during the year. The school has received 35 lectures on Friday afternoons from members of the Medical and Surgical Staff and others. In the month of March there were four lectures on sociological topics to the third-year nurses and the undergraduates, as follows: Miss Alice L. Higgins, "Mendicancy"; Mr. B. Preston Clark, "Handicraft"; Mrs. Alice N. Lincoln, "Personal Service"; Mr. Charles F. F. Campbell, "Seeing by Touch, or How the Blind Become Self-supporting." We are greatly indebted to these speakers for so generously giving their valuable services.

Mrs. Boland-Pequignot has continued as instructor in cooking, and during the year has delivered three lectures before the entire school and forty-one practical lessons in sections of ten to the second-year nurses.

The course in massage has been conducted by Mrs. Gulli J. Callowhill, all second-year nurses being taught in sections of four pupils each.

William G. Dwinell, M.D., First Executive Assistant, resigned October 10, 1904; Samuel G. Underhill, M.D.,

Second Executive Assistant, was promoted to fill the vacancy, and Appleton W. Smith, M.D., was appointed Second Executive Assistant.

At the South Department, William W. McKibben, M.D., Assistant Resident Physician, resigned April 11, 1904; Nathaniel R. Mason, M.D., was appointed to fill the vacancy, he resigned July 5, 1904; Bayard T. Crane, M.D., was temporarily appointed to fill the position until October 1, 1904, when George P. Sanborn, M.D., was appointed Assistant Resident Physician.

At the Relief Station, Percy Bartlett, M.D., Resident Surgeon, resigned April 1, 1904, and Stuart V. R. Hooker, M.D., was appointed to the position.

In presenting my twenty-sixth annual report to the Trustees, I beg to renew my cordial acknowledgments for their personal kindness and official support.

I have the honor to be,

Your obedient servant,

GEORGE H. M. ROWE,

Superintendent and Resident Physician.

MEDICAL AND SURGICAL STATISTICS.

BEQUESTS.

GOODNOW FUND. — ELISHA GOODNOW of South Boston, who died in the year 1851, bequeathed to the city “all the rest and residue of my estate, real and personal, not otherwise disposed of,” for the purpose of establishing in the Eleventh or Twelfth Wards of the city a hospital for the sick; one-half of said fund to be applied for the establishment and maintenance of free beds, which should always be at the disposal and under the control of the officers of the government of said Hospital for the time being. Under this will the city came into possession of \$26,000 for the support of free beds.

NICHOLS FUND. — LAWRENCE NICHOLS, who died in September, 1862, made a bequest to the city of the sum of \$2,000 for “the establishment and endowment of a City Hospital.”

NORCROSS FUND. — 1868, January 1. The Trustees received the sum of \$2,000 from Hon. OTIS NORCROSS, as the foundation of a fund for the benefit of patients leaving the Hospital poor and destitute of proper clothing.

Balance on hand, February 1, 1904	.	.	.	\$2	10

The "Act to incorporate the Trustees of the City Hospital of the City of Boston" (see Acts and Resolves, 1880, chapter 174, approved April 7) provides that "money received by it shall be invested by the Treasurer of the City of Boston under the direction of the Finance Committee of said City; and all securities belonging to said corporation shall be placed in the custody of said Treasurer; *provided*, always, that both the principal and income thereof shall be appropriated according to the terms of the donation, devise or bequest, under the direction of said corporation."

HOUSE RULES.

WITH RULES FOR ADMISSION, GOVERNMENT, AND DIS-
CHARGE OF PATIENTS; ALSO RULES FOR VISITORS.

HOUSE RULES.

The doors and gates of the Hospital will be closed at 10 o'clock in the evening, at which time all inmates shall be quiet and all not on duty shall be in their rooms, unless otherwise specifically permitted.

All officers, nurses, and employés of the Hospital, when going and coming to and from the Hospital, shall enter and go out by the Entrance Office, and by no other entrance. Such officers and employés as are required shall use the time register and method of booking that the Hospital rules require.

A record shall be kept of all persons entering the Hospital between the hours of 10 o'clock in the evening and 7.30 o'clock in the morning.

No employé shall be absent from the Hospital except when permitted by special rules or by the Superintendent.

No officer, nurse, orderly, or other employé shall directly or indirectly receive money or other gifts from or in behalf of patients, except with the approval of the Superintendent.

The use of tobacco, wine, and intoxicating liquors is prohibited within the Hospital, unless prescribed by the Physicians or Surgeons.

All profane and improper language, loud talking and incivility are prohibited.

All employés shall observe such further rules and directions for their conduct as may from time to time be established.

ADMISSION OF PATIENTS.

Applications for admission of patients may be made at the

Hospital on each day of the week, Sunday excepted, between 9 o'clock A.M. and 6 o'clock P.M.

Whenever able, a patient shall apply in person for admission; when not able to apply in person, a patient may be admitted on application made in his behalf, or upon visit at his residence by the admitting Physician.

Persons accidentally wounded, or otherwise disabled or injured, shall be received at all hours.

Patients may be admitted to the privileges of the Hospital at such rates of board as the Trustees may, from time to time, by vote determine; payment for such board being secured by the friends of the patients or by the authorities of the cities or towns to which the patients belong.

Whenever, in the opinion of the Trustees, the circumstances of the patient will warrant it, the whole or a part of the board shall be paid. If separate apartments, or articles not usually furnished at the Hospital, are provided, such payment shall be made therefor as the Trustees shall deem reasonable.

No person having acute venereal disease or alcoholism shall be admitted except as a paying patient.

No person shall be admitted to the Hospital whose case is judged to be incurable, unless there be urgent symptoms which are deemed capable of being relieved.

GOVERNMENT OF PATIENTS.

Patients shall implicitly observe all the rules of the Hospital.

Patients shall be in their proper places in the wards during the visits of the Physicians and Surgeons, and always before 7.30 o'clock in the evening, unless specially excused by the Superintendent.

Such free patients as are able shall assist in nursing, and perform such other services as may be reasonably required of them.

No patient shall leave the Hospital grounds without a pass from the Superintendent, nor leave his ward without the consent of the nurse in charge.

No patient shall purchase, or cause to be purchased for him,

any article of food whatsoever, or any other article, without the consent of the Superintendent.

Profane and obscene language, loud talking, and incivility are prohibited.

Patients may be visited by clergymen of their own selection, and any wish for the performance of a particular religious rite shall be granted when practicable.

Complaints, for whatever cause, may be made to the Superintendent, and whenever requested shall be by him reported to the Trustees.

DISCHARGE OF PATIENTS.

Patients shall be discharged by the Superintendent.

Patients discharged on the recommendation of the Visiting Physicians or Surgeons shall be provided with a certificate, stating their condition at the time of discharge, whether cured, relieved or not relieved, which certificate shall be signed by the Superintendent.

Whenever a patient is removed from the Hospital without the approval of the Superintendent, a written statement to that effect shall be required from any person assuming the responsibility of the removal.

VISITORS.

No person shall visit any part of the premises except on business, or at such times as may be fixed for the reception of visitors, without the permission of the Superintendent, or of some one of the Trustees.

Daily, including Sunday, from 2 to 3 o'clock in the afternoon, friends may be permitted to visit patients, though no patient shall receive more than two visitors at this hour; on week days from 6 to 6.30 P.M., one visitor may be allowed to each patient. In all cases, however, the Trustees and Superintendent may exercise discretionary powers as to excluding or admitting visitors.

When visitors are admitted outside of the regular visiting hours they shall not be permitted to remain more than half an hour, except a special permission to remain for further time is granted.

All visitors shall leave the Hospital when the bell rings at the expiration of the visiting hour.

No visitor shall take any meal in the Hospital, or pass the night therein, without permission of the Superintendent or one of the Trustees.

No visitor shall be allowed to give any article of food or drink to a patient, unless by permission of the nurse; and any article sent to a patient shall be left at the Entrance Office.

SPECIAL RULES FOR THE GOVERNMENT OF THE SOUTH DEPARTMENT.

The department of The Boston City Hospital located on the westerly side of Massachusetts avenue shall be designated as the South Department of The Boston City Hospital. It shall receive patients who require treatment for diphtheria and scarlet fever, and for other infectious diseases as may be determined from time to time by the Trustees.

The Superintendent of the Hospital shall, under the direction of the Trustees, have the general control and management of this department, in the same manner as of other departments of the Hospital.

The Rules of the Hospital shall, so far as applicable, and except as hereinafter provided, apply to the various officers and employés and to the conduct and management of this department.

SPECIAL RULES FOR THE GOVERNMENT OF THE RELIEF STATION.

The Boston City Hospital Relief Station is established not as a Hospital, but as a department of The Boston City Hospital for temporary relief, and the rules and methods prevailing now in the Hospital shall, so far as applicable, and not inconsistent with special rules, apply to the Relief Station.

The station shall afford temporary relief in all classes of accident and disease. It shall be open at all hours for patients requiring treatment or attention. Patients requiring ward treatment, whether received at the Station or taken up in ambulances, shall, so far as consistent with their welfare, be forthwith transferred or carried to the Hospital for extended treatment, but ward accommodations shall be afforded patients whose condition is such that they cannot properly be transferred. Patients may, however, if it is deemed desirable, be transferred by the ambulances to other hospitals or to their homes. First treatment may be afforded at the Station, although the applicants are not such as require ward treatment.

The Superintendent of the Hospital shall have the general administration, management, and control of the Station, the same as of other departments of the Hospital.

The Superintendent shall, from time to time, as may be necessary, nominate, for confirmation by the Trustees, a Resident Surgeon and one or more Assistant Resident Surgeons, and shall appoint and employ or detail for service in this department, subject to the approval of the Trustees or of the proper Committee, a Matron, a Supervisor, nurses, orderlies and such other minor employés as may be required for the proper conduct of the Station, who shall be subject to his supervision.

The various officers and employés of the Station shall perform such duties, other than those specified, as may be

required by the Trustees or the Superintendent, according to the nature of their respective duties. The Resident Surgeons, the Matron, Supervisor and such other officers as may be so required shall reside at the Station.

AMBULANCE SERVICE.

The ambulance service of the Station shall be under the direct control of the Resident Surgeon, and shall coöperate with that of the Hospital, with which it shall form one general system. Ambulances shall, in response to calls, be despatched from the Station or the Hospital, as the exigency may require. The utmost despatch shall be exercised in the ambulance service, so far as is consistent with a regard for the welfare of the patient and the interests of the public.

Ambulances shall in general be sent from the Station or the Hospital at least upon a general alarm to all fires occurring in the city proper, and in such further districts as may be determined upon.

An ambulance shall be held during the hours of the day in complete readiness to make immediate response to calls, and shall be kept in condition to make prompt response to calls at any time of the night.

A House Officer shall accompany the ambulance, shall direct its course, and shall have direction of the care and treatment of the patient until received at his destination.

The Foreman of the ambulance service at the Hospital Station shall visit and inspect the Ambulance Department of the Station from time to time, but the immediate carrying out of directions shall be under the Assistant Foreman at the Station.

PATIENTS.

Alcoholic and insane patients shall not be received unless there is surgical or medical complication making Hospital treatment absolutely necessary.

No patient, after being admitted to the wards, shall leave the Station until his discharge, without a pass from the proper officer, nor shall he visit other parts of the Station without permission.

Ward patients shall be discharged by the Superintendent or Resident Surgeon.

SPECIAL RULES FOR THE GOVERNMENT OF THE CONVALESCENT HOME.

The department of The Boston City Hospital located on Dorchester avenue, in Dorchester, shall be known as the Convalescent Home, and shall receive such patients recovering from acute diseases as shall be transferred to it from the main Hospital for treatment during convalescence.

The Superintendent of the Hospital shall, under the direction of the Trustees, have the control and management of the Convalescent Home, in the same manner as of other departments of the Hospital.

The Superintendent shall appoint, subject to the approval of the Trustees, a Matron, and shall employ, under their direction, such further assistants as may be necessary for the proper conduct and service of the Home.

The Matron, under the direction of the Superintendent, shall have the immediate charge of the Home, and the control of all nurses and other employés and patients. She shall reside at the Home.

VISITORS.

Friends may be permitted to visit patients on week days, between 3 and 4 o'clock in the afternoon. In all cases the Trustees, Superintendent, and Matron may exercise discretionary powers as to excluding or admitting visitors.

Visitors shall leave the Home and grounds at the expiration of the visiting hour, and shall visit no part of the Home or grounds other than the reception-room, except by permission from proper authority.

No person shall give any article of food or drink to a patient unless by permission of the Matron.
